

DISC HARROW

Standard

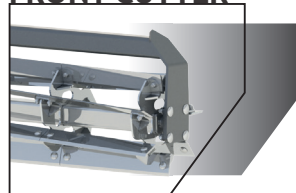

- straight adjustable hitch
- road wheels: 340/55-16
- two rows of disc section $\Phi 460$ mm
- maintenance-free hub
- rubber protection for each plate
- hydraulic adjustment of the disc section operation
- rollers to choose: Cambridge, Zig-zag, Steel pack
- simplified unfolding system JACEK
- vanish coating with improved parameters

hydraulically foldable,
trailed
4,2 - 6,2 m

Options

7 hardox knives
FRONT CUTTER

hydraulically adjustable
FRONT CROSS-BOARD

About the machine

The OX disc cultivator is a multi-purpose machine available in widths of 4.2 and 6.2 m. The aggregates use a simplified unfolding system, where after unlocking the blocking beam, the side sections are unfolded when reversing, then all sections are lowered to the working position using one hydraulic cylinder. The machine is equipped with $\Phi 460$ mm toothed discs, behind which there is a kneading roller, it is designed for high-speed first post-harvest cultivation and seed bed preparation. The machine can be equipped with various versions of front tools and packers, thanks to which it will meet all the requirements for equipment used in various modern farming systems - from very shallow tillage to deep soil loosening and mixing of crop residues with it. The versatility of the equipment ensures a reduction in the number of necessary passes, which reduces operating costs and creates the best conditions for the development of the plant.
